Data Management Plans

and a short introduction to ELIXIR & Digital Life Norway

Korbinian Bösl
Data manager ELIXIR Norway
4 March 2020

ELIXIR Europe

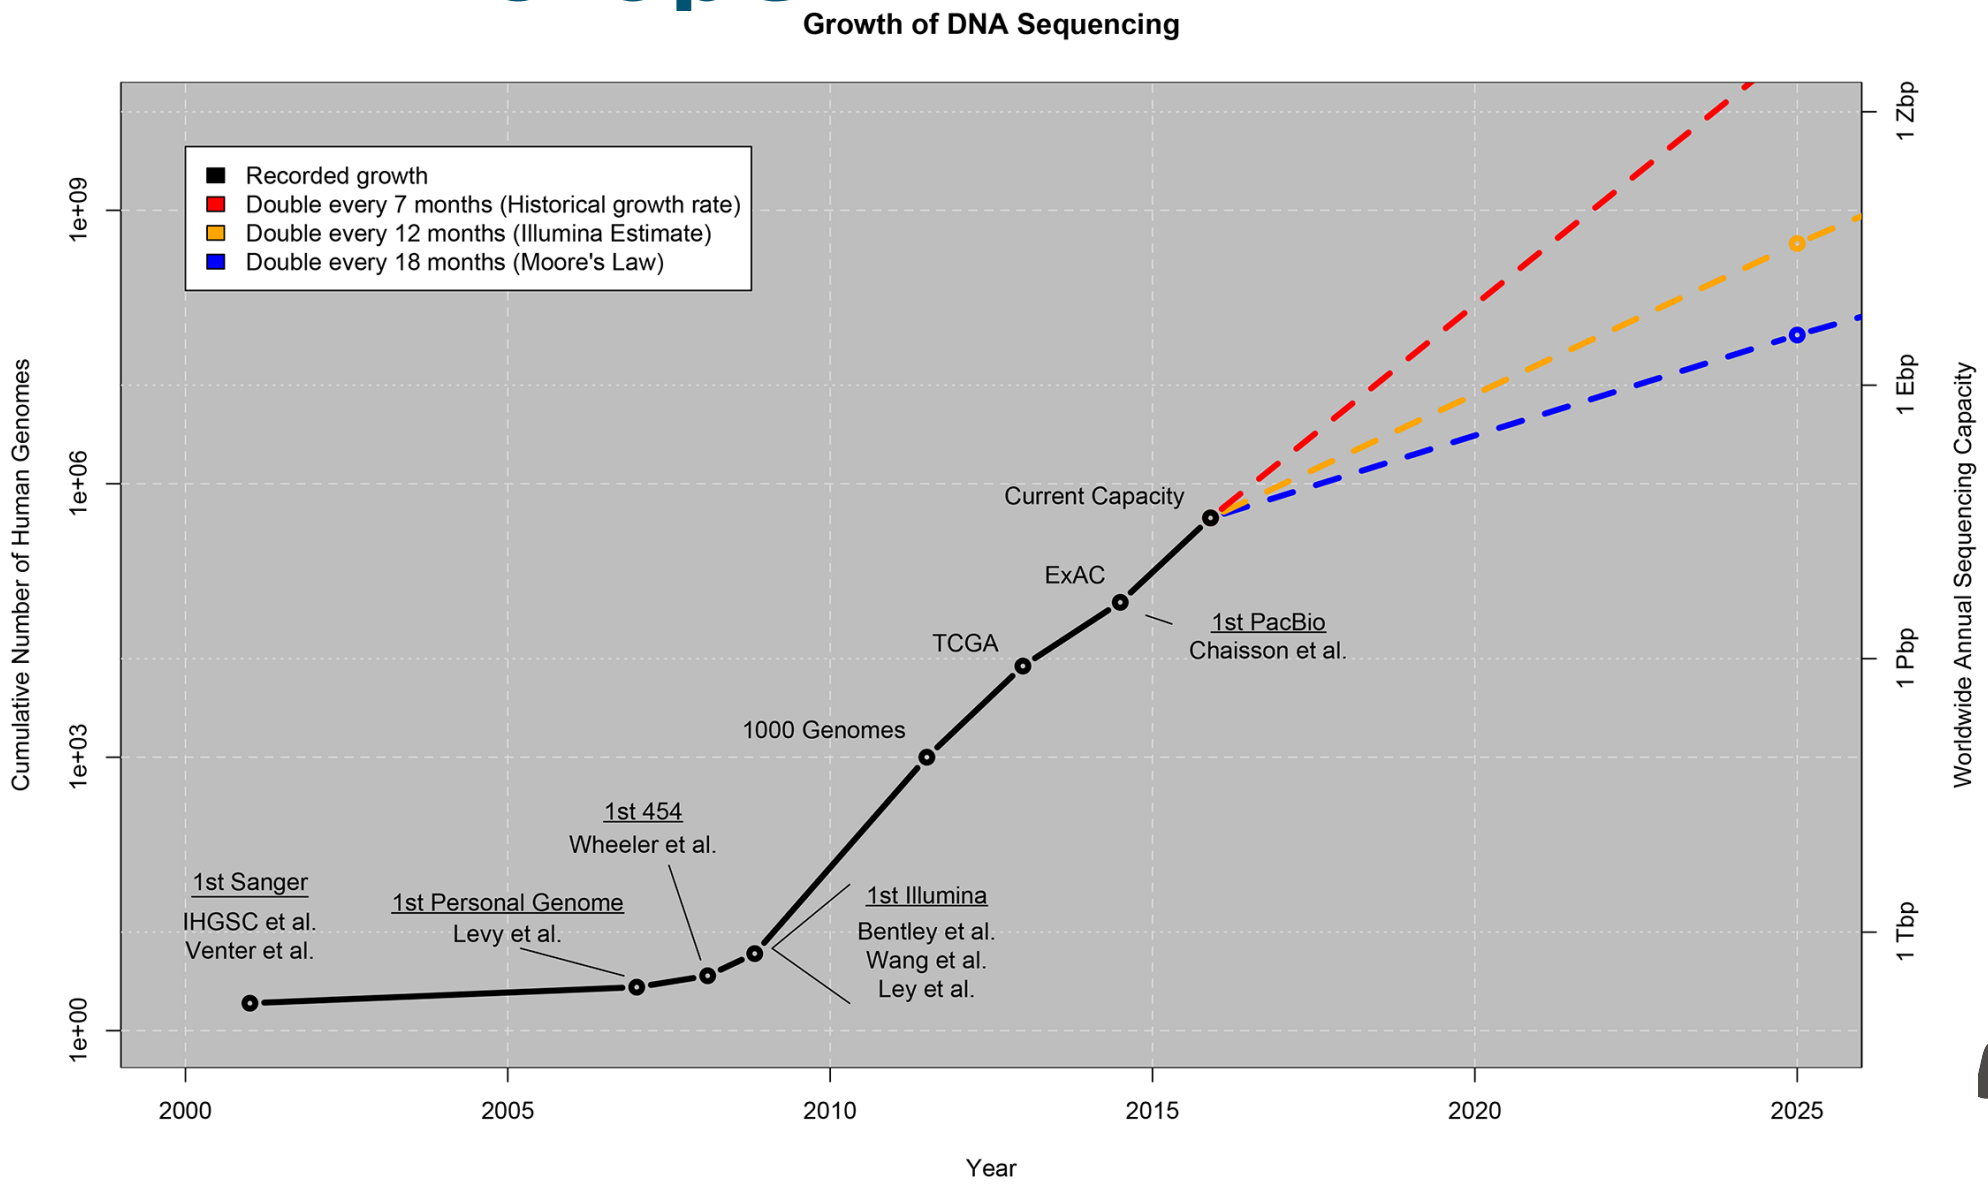
‘Data for Life’

Mission:

To operate a sustainable European infrastructure for biological information, supporting life-science research and its translation to society, the bio-industries, environment and medicine

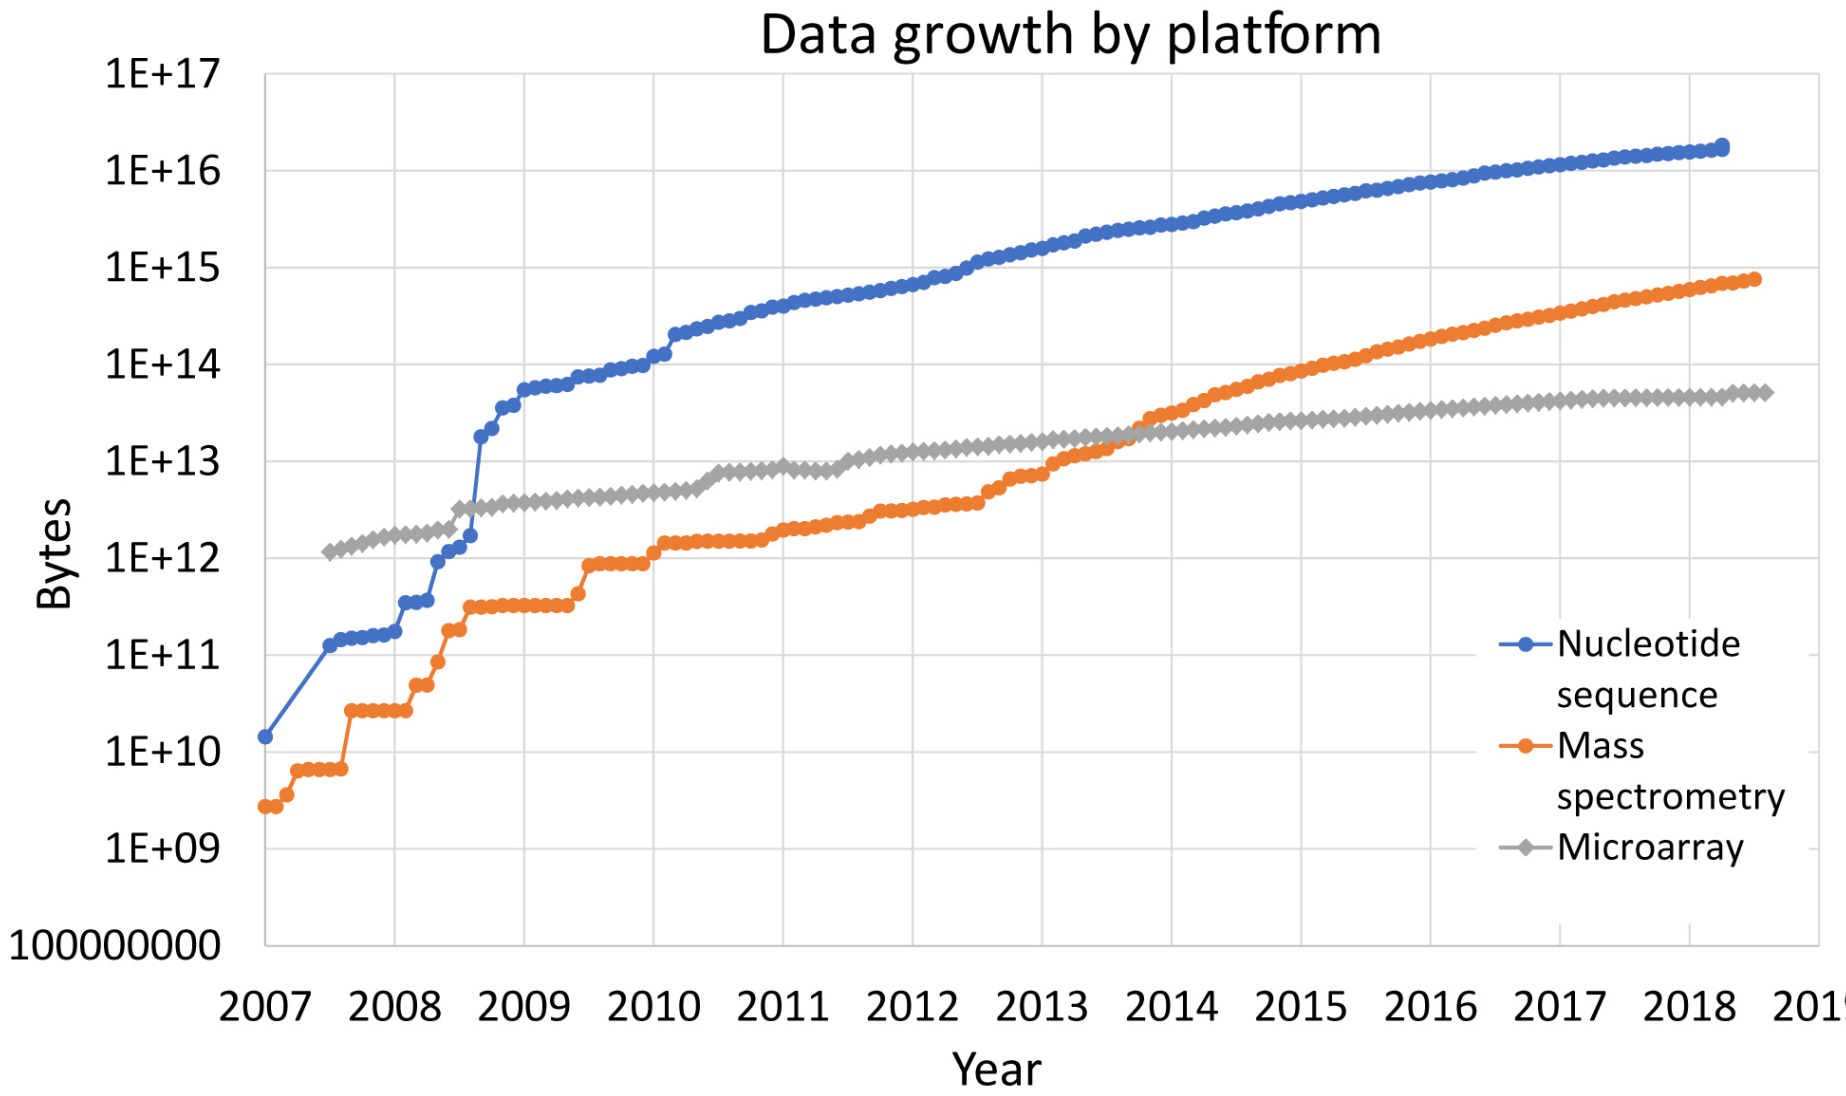
elixir NORWAY

ELIXIR Europe



Stephens, Z. D. et al. Big Data: Astronomical or Genomical? PLOS Biology 13, e1002195 (2015).

ELIXIR Europe



Data stored in ELIXIR/EBI-EMBL Repositories

Cook, C. E. et al. The European Bioinformatics Institute in 2018: tools, infrastructure and training. Nucleic Acids Res 47, D15–D22 (2019).

United Kingdom

ELIXIR Observers

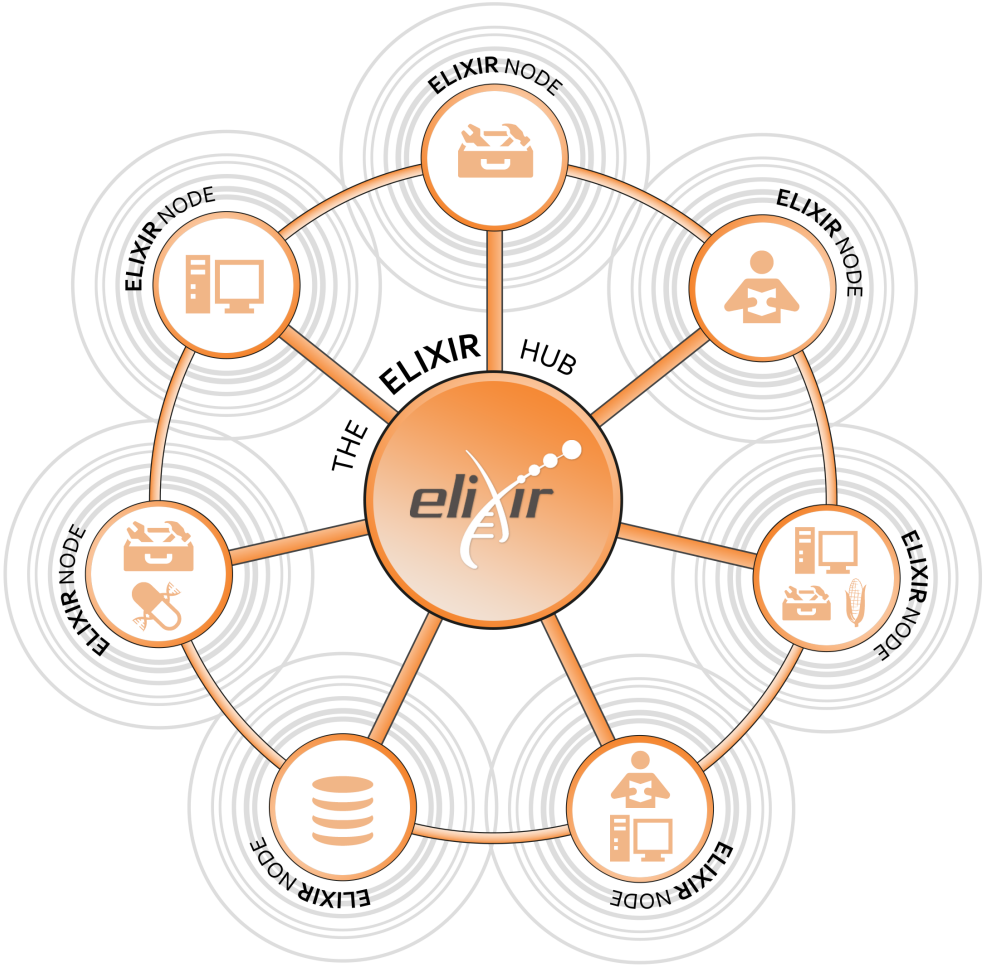
Cyprus

A distributed infrastructure to scale with the challenge

ELIXIR data infrastructure for Europe's life science research sector

ELIXIR Nodes build local bioinformatics capacity throughout Europe

ELIXIR Nodes build on national strengths and priorities



ELIXIR Services

Data deposition:

ENA, EGA, PDBe, EuropePMC, …

ELIXIR Services

Data deposition:

ENA, EGA, PDBe, EuropePMC, …

Data management:

Genome annotation

Data management plans

ELIXIR Services

Data deposition:

ENA, EGA, PDBe, EuropePMC, …

Data management:

Genome annotation
Data management plans

Added value data:

UniProt, Ensembl, OrphaNet, …

ELIXIR Services

Data deposition:

ENA, EGA, PDBe, EuropePMC, …

Data management:

Genome annotation
Data management plans

Added value data:

UniProt, Ensembl, OrphaNet, …

Data Interoperability:

FAIRSharing, identifiers.org, OLS, Bioschemas, …

ELIXIR Services

Data deposition:

ENA, EGA, PDBe, EuropePMC, …

Data management:

Genome annotation
Data management plans

Added value data:

UniProt, Ensembl, OrphaNet, …

Data Interoperability:

FAIRSharing, identifiers.org, OLS, Bioschemas, …

Compute:

Secure data transfer, cloud computing, AAI

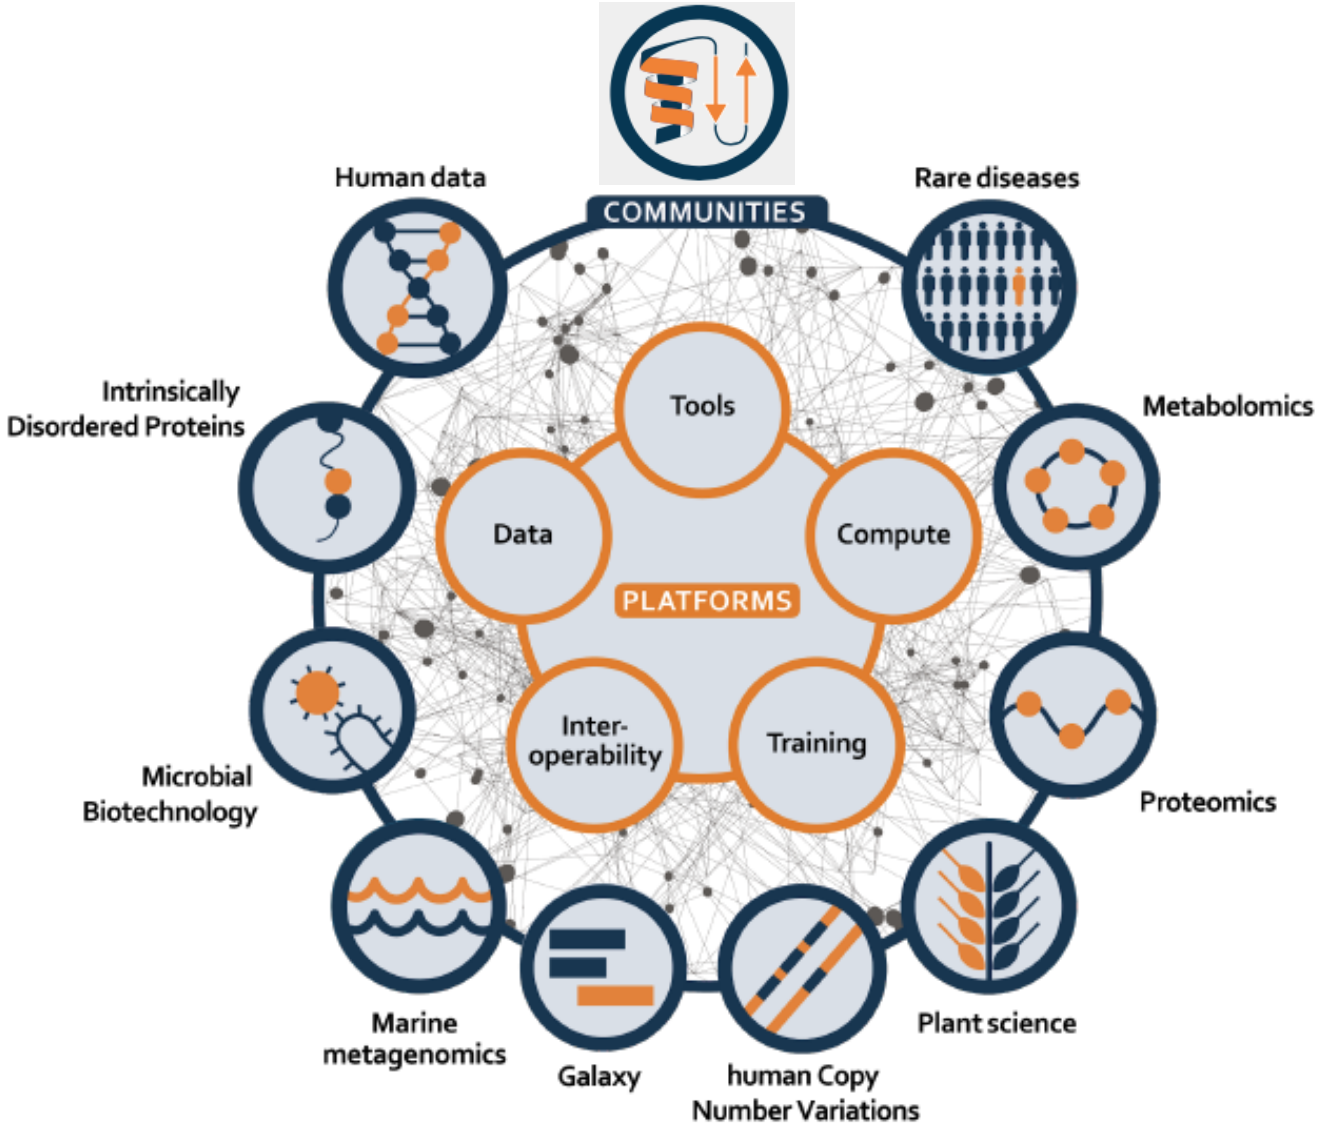
Training:
TeSS, Data Carpentry, eLearning

ELIXIR Structure

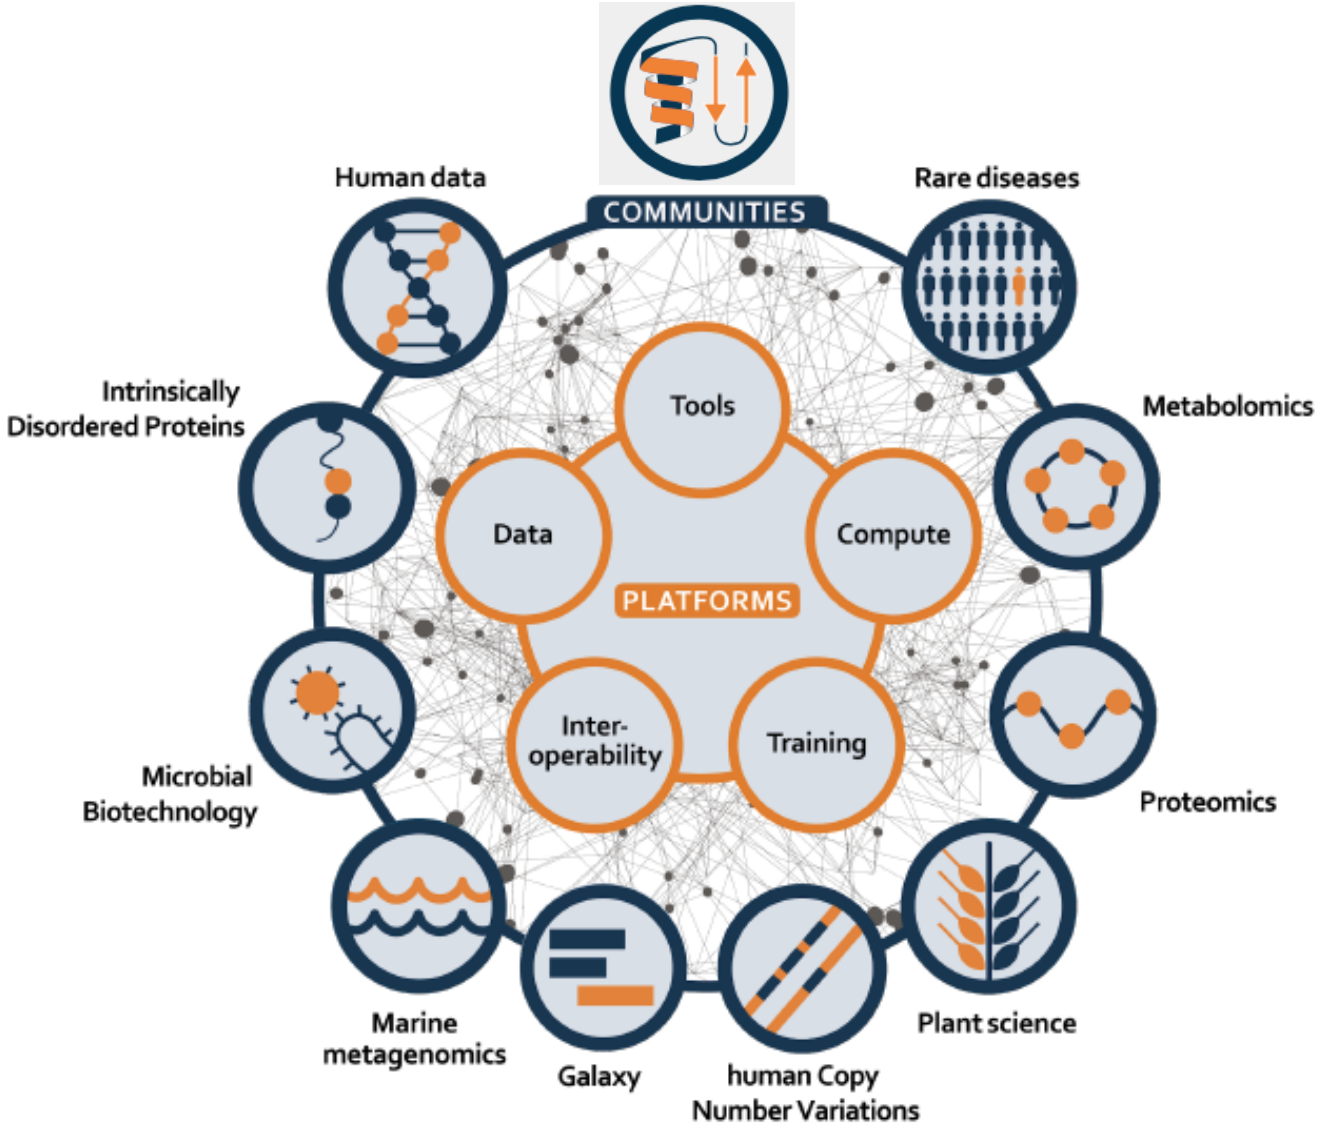
Five technical **Platforms** for **Compute**, **Data**, **Tools**, **Interoperability**, and **Training**



ELIXIR Structure

Five technical **Platforms** for **Compute**, **Data**, **Tools**, **Interoperability**, and **Training**

Complemented by **Communities** for specific use cases within e.g. **Human data, Metabolomics, Proteomics, Marine Metagenomics, Microbial Biotechnology, Structural Bioinformatics** and others



ELIXIR Structure

The Norwegian node of ELIXIR Europe

Currently funded by:

The Research Council of Norway (until 2021)

The involved institutions; UiB, UiO, NMBU, NTNU and UiT

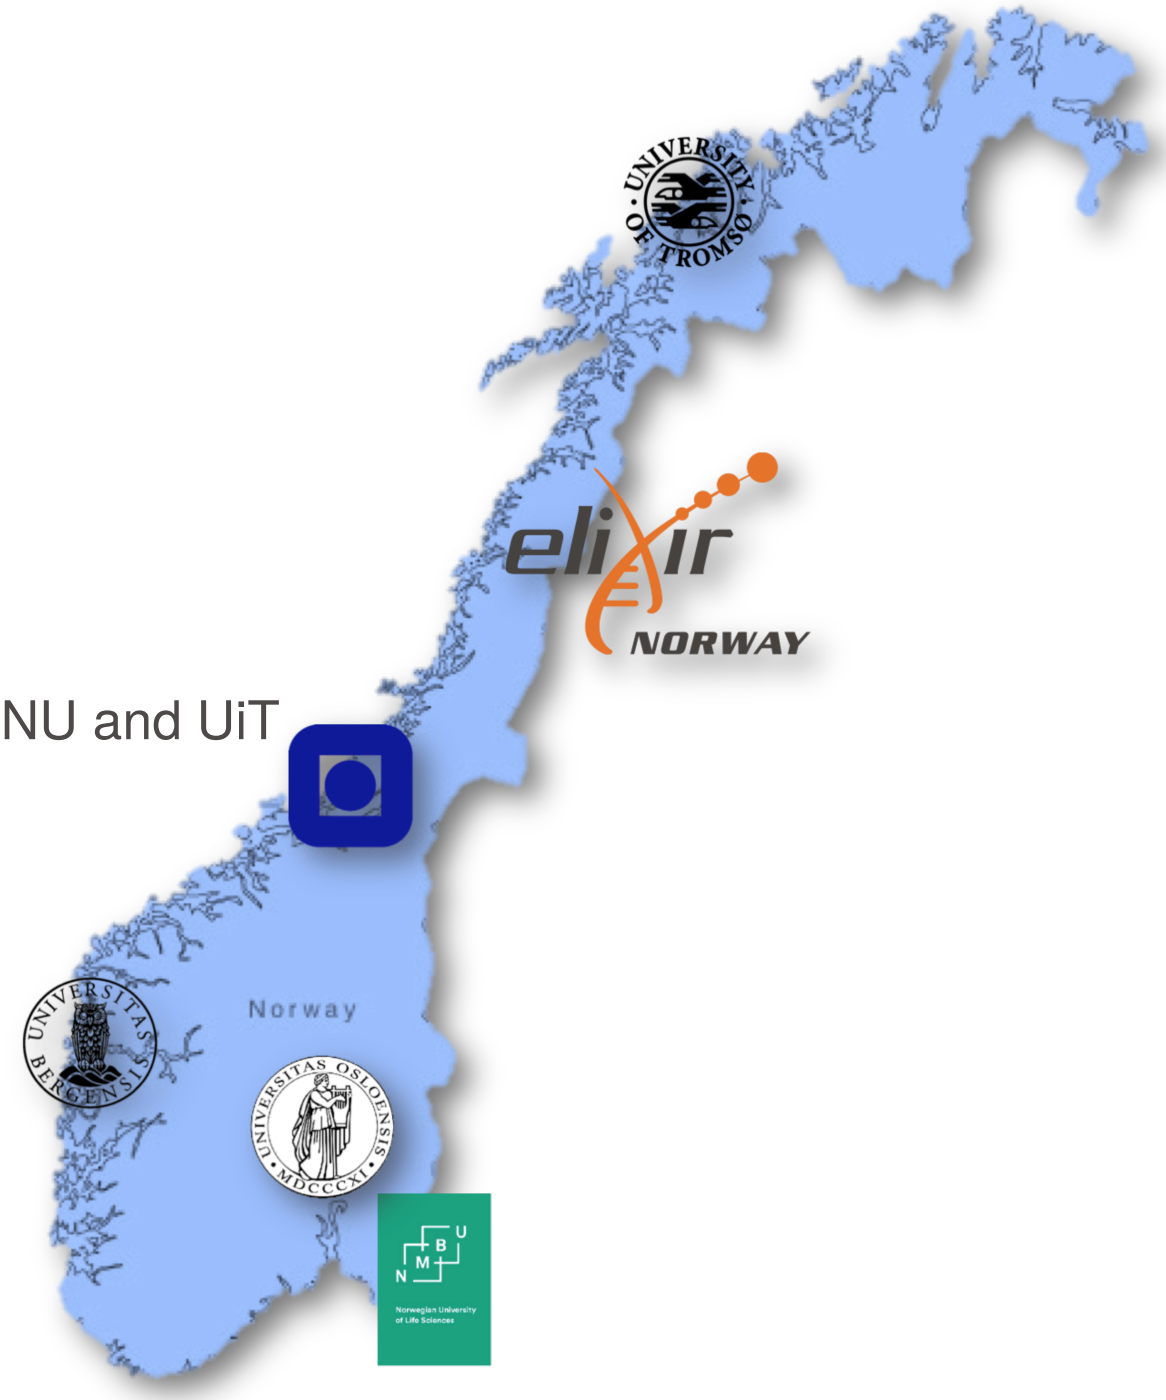
Users

Services to national users

Infrastructure, support and training

Deliverables to ELIXIR Europe

Tools and databases



Our additional user services - Norway

Support – through our HelpDesk

Training – in using our tools and workflows, and in data management

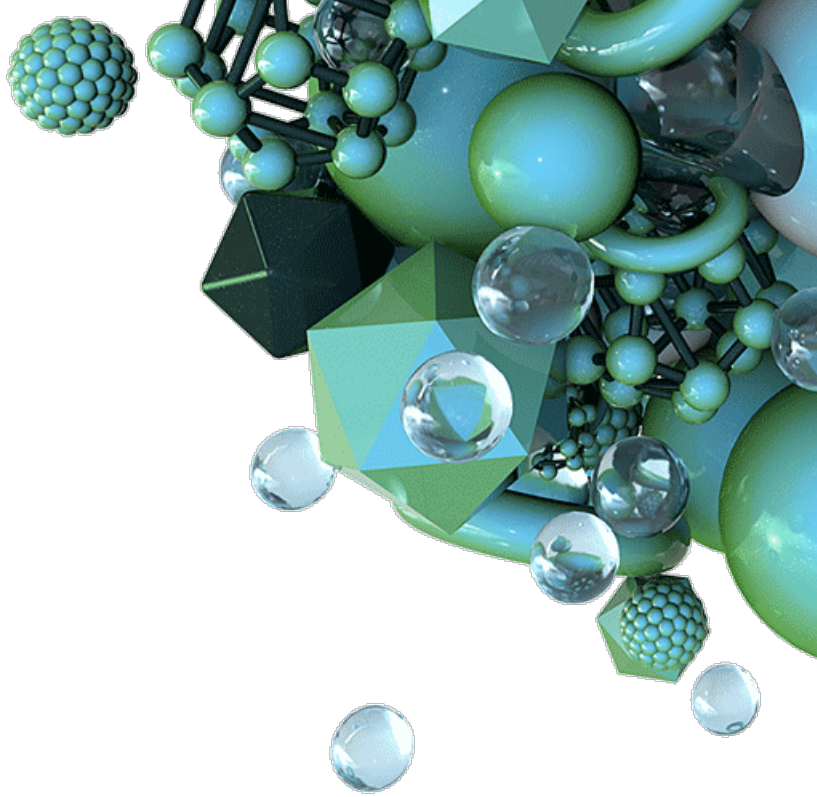
Bioinformatics infrastructure

Analysis, sharing and storage of data

contact@bioinfo.no

elixir NORWAY

CENTRE FOR DIGITAL LIFE NORWAY



Support for trans-disciplinary participating projects:

Responsible Research and Innovation

Innovation and industry involvement

Training & Research school

Competence and infrastructure – incl. Data Management

Outreach communication

Data Management

Make research data and related metadata **discoverable**, **accessible** and **understandable** today, tomorrow, and well into the future.
